

Network Building & Collaboration

International Health Policy Forum

May 4- 6, 2017

Tbilisi, Georgia

Caitlin McGowan

Capacity Building/Assessment

- Central Organization
 - Administration
 - Infrastructure for streamlined engagement
 - Website development
- Technology
 - Engagement with community partners for policy and research translation
 - Virtual library
 - Information sharing
- Civil Society
 - Coalition development – interdisciplinary
 - Community organization
 - Outreach Meetings and/or engagement with stakeholders

Global Health Education & Resources

- Distance Learning/Information Sharing
 - Medical & Clinical Research
 - Legal Research
 - Holistic approach to research and training
 - *How can we build on the foundations set here to promote academic centered relationships? How can we bridge these partnerships with community based organization?*
- Partnerships (formal & informal)
 - UN agencies, donors and foundations, nongovernmental organizations (NGOs)
 - Medical associations and patients rights groups
 - Think tanks and policy development organizations

Development & Engagement (Action Plan)

- Organization:
 - *Some public health networks organize around institutions, a formal international body, or funding mechanism – what are some of the systems that can be utilized here?*
 - *What relationships should be prioritized? Are formal organizations or informal collaborations a priority?*
- Messaging:
 - *Why do some public health networks crystallize around certain public health issues more than others?*
 - *Are there particular strategies for framing and communications that can be utilized here?*
 - *What are the causal relationships that will be identified as we set our agenda?*
- Goals & Measurement:
 - *What is the type of change that we specifically want to effectuate?*
 - *What would the outputs, policy changes, or impacts be that would be considered successful?*
 - *What expectations do we have across areas for our action plan?*
 - *Are these goals measurable?*

Development & Engagement (Action Plan)

- Participation across populations (gender, income, etc.):
 - *Are there particular groups that should be emphasized first?*
 - *Agent/Principals: Who are the agents that we are looking to represent? What are the expectations that we should set for them?*
 - *Incremental v. Holistic (i.e. prevention versus spectrum of care)*
 - *How can participation be approached in a way that is inclusive but also measurable?*
- Buy-in:
 - *Timelines for broadening partnerships and relationships (international organizations, government, etc.)*
 - *Are there lynchpin stakeholders?*
 - *Path dependence: what are some of the obstacles that need to be considered?*
- Long-Term Strategy:
 - *What are the immediate needs?*
 - *If successful, where can the network/organization expand with respect to public health goals/priorities?*
 - *At what point will some of these issues intersect with politics/norms/laws and what are the expected outcomes/necessary steps?*

Synopsis & Action Plan

- Identification of Priorities
- Timeline
- Leadership & Organization
- Future Steps

Thank you
